MEDIAWORKS

Project Description

Custom Technology Systems in partnership with ARA Security supplied and installed Alvarado SU5000 Optical Turnstiles for Mediaworks new Auckland Head Office.

System Solution

Two sets of Alvarado SU5000 Optical Turnstiles 2Lane Combo. Consisting of one standard passage width and one disability accessible width.

Integrated to ICT Protege Access Control System.

Bi-Directional Swing Barriers open for staff when they present their valid access control credential, in this case being their staff identification card.

Customisation and Design

1200mm Mid-Height Bi-Directional Acrylic Swinging Barriers.

Dynamic Blue Side Panel LED Lighting provides both interior design features, and also way-finding and security benefits.

Upon a receipt of authorisation, the lighting becomes "green" to identify that access is granted.

Alarm conditions such as unauthorised entry, tailgating, loitering ect, changes the lighting to "red" to visually notify staff.

Custom Technology Systems were approached by AECOM Engineers to supply a solution for the new Auckland Head Office which was bringing all of Mediaworks' brands and radio stations into one building.

With 850 staff, Mediaworks required a solution which not only can provide rapid throughput to facilitate the entry of staff, but also looked aesthetically pleasing.

Two sets of Alvarado's 2Lane SU5000 Optical Turnstile located either side of the reception desk were chosen as a fit-for-purpose solution.

The solution paid dividends, as architects Warren and Mahoney won the award for "Interior Workplace of the Year" with their design for the Mediaworks HQ.
